Deadline for manuscript submissions:

31 May 2024

Message from the Guest Editors

The Special Issue "Health Data Information Retrieval" has been OPEN!

The increasing proliferation of digital health data coming from a variety of sources, including electronic health records, laboratory results, and personal device data, is bringing new opportunities for improving healthcare and research. Such data are characterized from a wide heterogeneity in terms of content, format, and clinical domain and representation, ranging from structured to unstructured forms (such as text, images, signals, and so on). This raises a number of challenges relating to effective storage, access, and searching of information for several purposes in the domain of healthcare.

Authors are invited to contribute by submitting original papers describing research findings, innovative solutions, and lessons learned in health data information retrieval. The aim of this Special Issues is to provide both a showcase to present the main research results in the area and an engine to introduce and explore new concepts.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank: CiteScore - Q2 (Information Systems)
