Message from the Guest Editors

Dear Colleagues,

We often use languages. First, to communicate between ourselves. Later, to communicate with computers. In addition, more recently, with the advent of networks, we found a way to make computers communicate among themselves. All these different forms of communication use languages, different languages, but languages that still share many similarities. In this Special Issue, we will publish an extended version of best papers selected from Symposium on Languages, Applications, and Technologies (SLATE'17).

In this Special Issue, the three types of processing languages are addressed: Human–Human (HHL), Human–Computer (HCL) and Computer–Computer Languages (CCL).

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compindex](#), [dblp](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*Information Systems*)
