Message from the Guest Editors

Machine learning (ML) and distributed ledgers (DL) are two of today's most innovative technologies. The first is the evolution of statistics, artificial intelligence, and big data analysis, and the second is a decentralized database paradigm that has significantly disrupted the financial industry. Blockchain is currently the prominent but not the only DL solution and at the basis of the flourishing crypto ecosystem.

Blockchain technology, while still in its infancy, is maturing rapidly. As it is growing, so does its userbase and the abundance and variety of available applications. However, scaling problems are an issue when the amount of data passing hits a limitation due to the insufficient capacities of the blockchain.

Deadline for manuscript
submissions:

31 January 2025

an Open Access Journal by MDPI

Avenue, Wollongong, NSW 2522,
Australia

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compendex](#), [dblp](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*Information Systems*)
