

an Open Access Journal by MDPI

Neuromorphic Engineering and Machine Learning

Guest Editors:

Dr. Juan P. Domínguez-Morales

Computer Architecture and Technology department (ATC), University of Seville, 41012 Seville, Spain

Dr. Fernando Perez-Peña

Computer Architecture and Technology Department, Faculty of Engineering, University of Cadiz, 11003 Cadiz, Spain

Deadline for manuscript submissions:

30 June 2024

Message from the Guest Editors

Neuromorphic engineering proposes the use of biologically plausible models applied to engineering applications. The brain has been proven to solve complex problems in the most efficient way thanks to evolution. Therefore, replicating the way in which the brain performs specific tasks has become an interesting and promising field of research.

This Special Issue focuses on recent advances in neuromorphic engineering, including neuromorphic sensors, neuromorphic systems, bio-inspired models, spiking neural networks, and machine learning, which consider both hardware (digital or analog circuits) and software implementations.

Submissions to this Special Issue on ‘Neuromorphic Engineering and Machine Learning’ are solicited to represent a snapshot of the field’s development by covering a range of topics such as (but not limited to) the following:

Event-based sensors: vision, audio, tactile, olfactory;

Spiking neural network models;

Spike-based central pattern generators;

Machine learning applied to spike-based systems;

Deep learning algorithms for neuromorphic applications.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compindex](#), [dblp](#), and [other databases](#).

Journal Rank: [CiteScore - Q2 \(Information Systems\)](#)
