Message from the Guest Editor

Dear colleagues,

We are pleased to invite you to submit a contribution to this Special Issue on “Computational Modeling of Masonry and Reinforced Concrete Structures”.

Masonry and reinforced concrete structures constitute the vast majority of our civil infrastructures all over the world, which are subjected to various loads affecting their lifespan, serviceability, and performance. Recently developed computational modeling strategies offer accurate predictions and a better understanding of masonry and reinforced concrete structures that are key to achieving sustainable conservation plans and preventing unexpected partial/full life-threatening collapses.

This Special Issue of *Infrastructures* aims to feature a collection of up-to-date computational simulations encompassing meso- to macro-scale analyses of masonry and reinforced concrete structures. We invite original contributions, including but not limited to the serviceability, failure, and performance assessment of masonry and reinforced concrete structures using up-to-date continuum- and discontinuum-based analyses, case studies, and critical literature reviews.

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: CiteScore - Q2 (*Building and Construction*)
