

Selected Papers from the 15th Workshop of the European Cyclotron Network (CYCLEUR 2023)

Guest Editors:

Prof. Dr. Saverio Braccini

Albert Einstein Center for
Fundamental Physics,
Laboratory for High Energy
Physics, University of Bern,
Sidlerstrasse 5, CH-3012 Bern,
Switzerland

Prof. Dr. Francisco Alves

ICNAS—Institute for Nuclear
Sciences Applied to Health,
University of Coimbra, Pólo das
Ciências da Saúde, Azinhaga de
Santa Comba, 3000-548 Coimbra,
Portugal

Dr. Dana Niculae

Horia Hulubei National Institute
for Physics and Nuclear
Engineering (IFIN-HH),
Radiopharmaceutical Research
Centre, Reactorului Street 30,
077125 Magurele Ilfov, Romania

Message from the Guest Editors

The 15th Workshop of the European Cyclotron Network (CYCLEUR) will take place in Bucharest (Romania) on 22–23 June 2023. After the last edition before the COVID-19 pandemic in Dresden (2019), this event will reassemble again major experts in the field of cyclotrons, radioisotope production, targets, and target chemistry. In recent years, significant advances have been made in these fields and novel instruments and methodologies have been developed with direct implications for science and society. In particular, the production of radioisotopes for both medical diagnostics and therapy—so-called “theragnostics”—received a boost that is producing a breakthrough in nuclear medicine. This Special Issue is intended to collect original scientific contributions on the latest developments on cyclotrons and related topics, and in particular, on their applications in medicine and multi-disciplinary research.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Antonio Ereditato

Enrico Fermi Institute, The
University of Chicago, Chicago, IL
60637, USA

Message from the Editor-in-Chief

The realization of dedicated instrumentation has always been a collateral aspect of experimental research. In addition, many groups dedicate efforts and resources solely to the development of new devices, sensors, equipment and large infrastructure, theoretical and numerical studies, and novel experimental methodologies. With Instruments we wish to address both established and emerging communities, also to favor the creation of innovative trans-disciplinary approaches. We see Instruments as an exciting high-impact journal that will soon hold a leading position in disseminating cutting edge scientific and technological research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, Inspec, CAPus / SciFinder, INSPIRE, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 5.4 days (median values for papers published in this journal in the second half of 2023).
