Inventions and Innovations in Optical Sensing Materials and Devices

Guest Editor:

Dr. Hsiang-Chen Chui

Department of Optoelectronic Engineering, School of Optoelectronic Engineering and Instrumentation Science, Dalian University of Technology, Dalian 116024, China

Deadline for manuscript submissions:

31 October 2024

Message from the Guest Editor

Advancements in optical sensing materials and devices have revolutionized various industries, including healthcare, telecommunications, and environmental monitoring. These inventions and innovations in optical sensing materials and devices have had a significant impact on various industries; from fiber optics revolutionizing telecommunications to quantum dots enhancing display technologies, these advancements have improved efficiency, accuracy, and performance in sensing applications. Moreover, optical sensing technology has transformed healthcare diagnostics and environmental monitoring, leading to improved patient care and a better understanding of our changing planet. Here, we invite researchers to submit their original research and review papers related to these topics. This Special Issue aims to provide a platform for researchers to share their latest findings and insights in the field of optical sensing materials and devices. We look forward to receiving your contributions.

Rd., Taichung 402, Taiwan

Prof. Dr. Shoou-Jinn Chang

Department of Electrical
Engineering, National Cheng
Kung University, Tainan 701,
Taiwan

Message from the Editorial Board

The unique journal *Inventions* is different from all other journals. Many scholars spend their lives publishing research papers in many different journals, but most of these journals do not help scholars collate and analyze their results or assist in promoting them to a relevant industry. However, *Inventions* will help authors not only to publish their papers in the journal, but also to promote their research results to industry and assist them in realizing the purpose of technology transfer. In the future, *Inventions* will help authors to evaluate their technology license fees based on the valuation theory and approaches and also help authors to show their patents and technologies on a network transaction platform.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: CiteScore - Q1 (General Engineering)
