Engineering, Electronics and  
Informatics, University of  
Catania, 95125 Catania, Italy

Deadline for manuscript  
submissions:

**closed (31 March 2023)**

### Message from the Guest Editors

This Special Issue follows the publication of the first edition on “Automatic Control and System Theory”. It still aims to explore new topics and new ideas in automatic control and system theory, including also advanced applications.

Authors are invited to submit contributions that focus on innovative schemes, innovative applications, and new theories in automatic control and system theory. Moreover, unsolved problems in mathematical systems and control theory is a fundamental topic for control scientists. The potential authors of the papers of this Special Issue can also take into account their contributions to propose new unsolved problems.

Authors are, therefore, invited to make efforts to be visionaries and to propose papers not usually found in automatic control journals; moreover, their efforts should also be addressed at focalizing new aspects of mathematics of systems.

Papers that discuss how to improve the educational aspects of automatic control and system theory will be welcome. Multidisciplinary papers emphasizing integration among control theory, human sciences, and history will also be considered.

an Open Access Journal by MDPI

### **Prof. Dr. Shoou-Jinn Chang**

Department of Electrical  
Engineering, National Cheng  
Kung University, Tainan 701,  
Taiwan

## Message from the Editorial Board

The unique journal *Inventions* is different from all other journals. Many scholars spend their lives publishing research papers in many different journals, but most of these journals do not help scholars collate and analyze their results or assist in promoting them to a relevant industry. However, *Inventions* will help authors not only to publish their papers in the journal, but also to promote their research results to industry and assist them in realizing the purpose of technology transfer. In the future, *Inventions* will help authors to evaluate their technology license fees based on the valuation theory and approaches and also help authors to show their patents and technologies on a network transaction platform.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

**Journal Rank:** CiteScore - Q1 (*General Engineering*)
