

## Nanomaterials and Nanocomposites for Environmental Applications

Guest Editors:

**Dr. Mallikarjuna N.  
Nadagouda**

**Dr. Hyuksang Chang**

**Dr. Changseok Han**

Deadline for manuscript  
submissions:

**closed (30 September 2018)**

### Message from the Guest Editors

Nanotechnology is a key word for this century to enhance different functions of current technology. Many nanostructured materials have been widely used to develop innovative nanotechnology for different applications. Currently, nanomaterials and nanocomposites have been attracting much attention in the field of environmental monitoring and remediation. Many studies reported that the use of nanomaterials and nanocomposites improved both the efficiency of treatment processes to decompose contaminants and the sensitivity of monitoring tools to detect contaminants. The aim of this issue is to highlight, and bring to the attention of researchers, the ongoing development in innovative nanomaterials and nanocomposites for different environmental applications along with their implications. It is not limited to water and air purification, soil and groundwater remediation, toxicity of nanomaterials, and the fate and transport of nanomaterials in the environment.

## Editors-in-Chief

### **Prof. Dr. Chien-Hung Liu**

Department of Mechanical  
Engineering, National Chung  
Hsing University, 250 Kuo Kuang  
Rd., Taichung 402, Taiwan

### **Prof. Dr. Shoou-Jinn Chang**

Department of Electrical  
Engineering, National Cheng  
Kung University, Tainan 701,  
Taiwan

## Message from the Editorial Board

The unique journal *Inventions* is different from all other journals. Many scholars spend their lives publishing research papers in many different journals, but most of these journals do not help scholars collate and analyze their results or assist in promoting them to a relevant industry. However, *Inventions* will help authors not only to publish their papers in the journal, but also to promote their research results to industry and assist them in realizing the purpose of technology transfer. In the future, *Inventions* will help authors to evaluate their technology license fees based on the valuation theory and approaches and also help authors to show their patents and technologies on a network transaction platform.

## Author Benefits

**Open Access:**— free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, ESCI (Web of Science), Inspec,** and other databases.

**Journal Rank:** CiteScore - Q1 (*General Engineering*)
