Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

Dear Colleagues,

This Special Issue will contain a selection of papers highlighting the current challenges in heart failure and cardiac transplantation. We welcome the submission of original research (basic research or clinical research), short communications, and review manuscripts focusing on the diagnosis, risk factors, treatment, and prognosis of as well as novel approaches to cardiac arrhythmias, cardiac pacemakers, cardiac resynchronization therapy, cardiomyopathies, congenital heart defects, heart failure, heart transplantation, implantable cardioverter-defibrillators, mechanical circulatory support, and ventricular assist devices.

Prof. Dr. Rasmus Rivinius
