20 May 2024

Message from the Guest Editor

Dear Colleagues,

Hysterectomy is one of the most frequently performed surgical procedures worldwide. Hysterectomy can be performed for benign disease, oncology, or hemodynamic instability in emergency cases of metrorrhagia. Over the years, several concerns have arisen about patients' quality of life, pelvic stability, vascular, ureteral, and bowel complications after hysterectomy. However, hysterectomy remains a necessary treatment in case of gynecological oncological pathology and a life-saving treatment in case of emergency.

This Special Issue aims to increase clinicians' knowledge of hysterectomy, as well as to review the role of hysterectomy in various gynecological diseases. We look forward to receiving your contribution.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
