Deadline for manuscript
submissions:

30 November 2024

Message from the Guest Editor

Dear Colleagues,

The previous Special Issue of the *Journal of Clinical Medicine*, highlighted our experience and was well received; as such, we have embarked on establishing Volume 2.

Polycystic ovary syndrome is a common disorder that encompasses very different clinical patterns and may be associated with an increased risk of diabetes and cardiovascular diseases.

This Special Issue will focus on some important clinical problems, including the role of obesity and metabolic disorders in the pathogenesis and clinical evolution of the disorder. A new possible classification of the syndrome based on genetic and clinical clusters will be discussed. The treatment of special clinical problems in PCOS will be reviewed and new data will be presented.

We invite contributions to this important project and encourage discussions on the pathogenesis and new possible classification of polycystic ovary syndrome.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
