submissions:

25 September 2024

Message from the Guest Editors

Musculoskeletal ultrasonography may provide many benefits for the diagnostics and monitoring of the human locomotor system. The main research goal for this Special Issue is to collect research papers based on clinical medicine outcomes and treatment implications, especially focused on contemporary advances and trends in medicine and rehabilitation.

The Special Issue determines the link between medicine and physical therapy, potential topics:

Literature review and meta-analysis proposing medical outcomes investigated by ultrasonography after different surgical interventions in the shoulder, elbow, knee, and ankle.

Novel applications for ultrasonography imaging in the shoulder, elbow, knee, and ankle. Original research and randomized-control trials based on analysis of ultrasonography after musculoskeletal surgical interventions.

Ultrasonographical evaluation of the musculoskeletal system during and/or after physical therapy intervention.

The future perspective of ultrasonography in medicine and physical therapy. Ultrasonography in other fields of medicine, e.g.: neurology, pediatrics, cardiology.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
