Message from the Guest Editors

Dr. Marco Guglielmo During the last 20 years, cardiac computed tomography (CCT) has emerged as a technique that can provide crucial Dr. Ibrahim Danad diagnostic and prognostic information in different clinical scenarios. CCT is now recommended by the international Dr. Saima Mushtag scientific society as a key tool in patients with acute and chronic coronary artery disease (CAD). Moreover, recent developments such as the study of myocardial perfusion Deadline for manuscript and fractional flow reserve have transformed CCT into a one-stop test able to offer all the anatomical and closed (15 July 2023) functional information to guide the management of patients with CAD. Finally, there is increasing evidence that CCT can be used for tissue characterization with remarkable clinical value, including the assessment of ischemic and non-ischemic cardiomyopathies.

> This Special Issue aims to discuss the potential and challenges of new and established clinical applications of cardiovascular CT

- cardiac computed tomography (CCT)
- coronary artery disease
- structural heart disease
- congenital heart disease
- atherosclerosis
- plague composition
- pericoronary fat inflammation
- ischemic and non-ischemic cardiomyopathies

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
