### Message from the Guest Editors

Dear Colleagues,

Oral and craniomaxillofacial surgery stands at the intersection of medicine, surgery, and dentistry, focusing on the diagnosis and treatment of a wide range of conditions affecting the oral cavity, jaw, face, and skull. With advancements in surgical techniques, technology, and interdisciplinary collaboration, this field has witnessed remarkable clinical advances and innovations in recent years.

This Special Issue of the *Journal of Clinical Medicine* aims to highlight the latest scientific content and groundbreaking research contributing to the evolution of oral and craniomaxillofacial surgery. From novel treatment modalities to innovative surgical approaches, the articles featured in this Special Issue provide valuable insights into improving patient outcomes, enhancing surgical precision, and addressing complex anatomical challenges.
