Deadline for manuscript submissions:

closed (25 May 2024)

Dear Colleagues,

Total joint arthroplasty (TJA) is an unparalleled success story of modern medicine and is one of the most consistently successful operations of the last century. TJA can alleviate the debilitating effects of osteoarthritis and completely restore patients' joint function, mobility and quality of life. These excellent results are made possible as the result of continued research and development in all areas of TJA. Improved diagnostics, patient selection and optimization, implant design, surgical technique and materials, as well as the management of complications have all resulted in improved functional results and implant survival.

All areas of TJA research are under continuing development, with the goal of improving the results of TJA and ultimately patient outcomes. These results must be vetted per scientific peer-review and published to ensure the ongoing global improvement of TJA. I would like to cordially invite you to submit manuscripts regarding all aspects of TJA to our Special Edition advances in arthroplasty.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
