Clinical Updates on Cardiac and Vascular Toxicities from Antineoplastic Drugs and Beyond

Guest Editor:

Prof. Dr. Rosalinda Madonna Department of Pathology, University of Pisa, 56124 Pisa, Italy

Deadline for manuscript submissions:

30 November 2024

Message from the Guest Editor

With the improvement in cancer prognosis due to advances in antitumor therapeutic protocols and new targeted and immunotherapies, we are witnessing a growing increase in survival; however, at the same time, an increase in morbidity among cancer survivors as a consequence of the increased cardiovascular adverse effects of antineoplastic drugs has also been observed. Common cardiac and vascular complications antineoplastic therapies may include arrhythmias, myocardial ischemia, and left ventricular dysfunction culminating in heart failure, as well as vascular complications with arterial hypertension, thromboembolic events, and accelerated atherosclerosis. In this Special Issue, we welcome authors to submit papers on clinical aspects in terms of prognosis, diagnosis, and treatment, as well as the novel mechanisms that are implicated in antineoplastic drug-induced cardiac and vascular toxicity.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
