18 September 2024

Message from the Guest Editor

Dear Colleagues,

Chronic pain is a complex phenomenon defined by the International Association for the Study of Pain as persistent or recurrent pain lasting more than 3 months or that lasts beyond normal tissue healing. Modern pain management must be tailored to each specific patient, considering several aspects that embrace the intensity of pain, its pathophysiology, the patient's comorbidities, the social context, and psychological aspects. Pharmacological, non-pharmacological, and also interventional techniques should be chosen on an individualized basis, with the aim of achieving "precision pain medicine". Answers to the questions, "What is the pathophysiological process that causes chronic pain in this patient, and how can I recognize it?", and subsequently, "What works for this patient?", represent challenges for the future that need to be met in order to improve clinical patient care.

The aim of this Special Issue is to summarize the most recent evidence on precision pain medicine, with a focus on diagnosis and treatment. Research articles, reviews, and communications are welcome.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
