submissions:

31 July 2024

Message from the Guest Editors

Dear Colleagues,

Pregnancy is a unique and special period in a woman's life. It is characterized by the presence of many alterations in the physiological and immune statuses. Several severe pregnancy-related conditions are not frequently seen in women of reproductive age. Often, various clinical specialties act in a multidisciplinary way to confront these complications. This clinical task is a difficult as well as demanding reality and endangers the lives of pregnant women and fetuses. New guidelines based on evidence-based medicine have been produced in order to minimize the frequency of these conditions. In the current Special Issue, we aim to review the pathogenesis and management of these pregnancy-related complications.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
