Message from the Guest Editor

Dear Colleagues,

Anesthesiology has evolved dramatically since the first public demonstration of ether in the 19th century. Nowadays, its scope extends far beyond the operating room. Our responsibilities have grown in magnitude, scope, and depth. Modern anesthesiology comprises perioperative care, acute and chronic pain management, critical care, emergency care, and of course research. Improvements in our quality of care are essential to further decrease the rate of adverse outcomes.

We welcome original and review papers concerning innovations and the newest developments in anesthesia, perioperative care, emergency care, and pain therapy to this Special Issue of *Journal of Clinical Medicine* to help anesthesiologists provide the most appropriate treatment for their patients in daily clinical practice.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
