Message from the Guest Editor

Dear Colleagues,

Cardiac rehabilitation is widely considered an important and often essential step in reducing the burden associated with cardiovascular disease in contemporary society. Patients that engage in formal supervised and unsupervised cardiac rehabilitation programs have consistently been shown to reduce the risk for premature mortality and chronic disease, while improving their overall health and well-being. Over the past 10 years, there have been marked advancements in the field of cardiac rehabilitation supporting the importance of adopting healthy lifestyle behaviours in the primary and secondary prevention of cardiovascular disease and other related chronic medical conditions. In this present Special Issue we will examine more closely recent innovations and advancements in cardiac rehabilitation. We will also evaluate the current evidence regarding the ability of cardiac rehabilitation to reduce the risk for chronic disease and premature mortality and to improve health and wellness.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
