Message from the Guest Editor

Dear Colleagues,

Cardiovascular and neurological diseases continue to be one of the most common chronic diseases worldwide, with a great impact on morbidity and mortality in the population. The new SARS-CoV-2 affected the risk and prognosis of cardiovascular diseases. Their management remains a challenge for healthcare professionals and patients around the world, especially in developing countries. This special issue of the Journal of Clinical Medicine will be dedicated to publishing the best articles that reflect efforts and innovation to better diagnose, measure impact, develop treatments and education for cardiovascular disease and related issues. In this Special Issue, we hope to collect the best original and review articles on various aspects related to diagnosis, prevention, control, treatment, cost-effectiveness, epidemiology, education and other issues related to this very prevalent disease. All submissions will be selected and peer-reviewed to ensure the quality and relevance of the manuscripts.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
