Message from the Guest Editors

Dear Colleagues,

Chronic fatigue syndrome, or myalgic encephalomyelitis (ME/CFS), or fibromyalgia, is a debilitating disease, with unknown causes. From the perspectives on the etiology and pathophysiology, CFS has been labeled differently, which influenced changes in case definitions and terminologies, like fibromyalgia, myalgic encephalomyelitis or chronic fatigue syndrome. Normally, we are used to identifying this disease as CFS, or chronic fatigue syndrome.

We solicited papers addressing CFS, fibromyalgia, fatigue, topics described and identified above, clinical, laboratory, therapeutic and research items, and related issues, in a creative and novel way. In addition, we solicited “Patients’ Associations and Groups” to publish their own reports on different national and international experiences. Research papers, clinical reports, trials reports, experimental treatment reports, laboratory investigation, reviews and new perspectives will also be accepted.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
