### Message from the Guest Editors

Dear Colleagues,

It is recognized that the prevalence of dry eye disease is rapidly increasing, as is its burden, with an associated important need for research into new therapeutics. Conventional dry eye treatments include over-the-counter products such as tear substitutes, warm compresses, lid hygiene shampoo or ocular gauzes. Clinicians now have several other choices for patients who are unresponsive to traditional therapies, or suffering from severely dry eyes, including topical medications, blood-derived products, and different types of energy delivery devices.

This Topical Collection aims to collect contributions from distinguished authors who actively experience, in their own experimental and clinical work, the most innovative options for dry eye disease.

Dr. Piera Versura

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
