Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editors

In recent years, immunotherapy has established as a first line treatment against several types of cancer. The emergence of this field, compared to chemotherapy, is enabling new promising tools to treat patients. Strategies such as checkpoint inhibitors and chimeric-antigen receptor (CAR) technology are leading new possibilities and better outcomes for patients. Nevertheless, as cancer researchers and physicians already know, not all tumors respond equally to immunotherapy, and there is still room for improvement.

For this Topical Collection, we would like to bring together recent advances and novel approaches that enable effective and safe cancer immunotherapy, with the goal to further facilitate its clinical translation. It is intended to cover a broad spectrum of related topics, including adoptive cell therapy, checkpoint inhibitors, monoclonal antibodies, cancer vaccines and immunomodulatory agents, among others. This Topical Collection will present original research work as well as scientific reviews, aiming to address the cutting edge advances in cancer immunotherapy.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
