submissions:

20 September 2024

Message from the Guest Editor

Dear Colleagues,

This Special Issue focuses on current surgical concepts (robotic versus laparoscopic rectal cancer surgery) as well as by standing treatment and therapy options, such as total neoadjuvant therapy for high-risk rectal cancer (cT4,cN2, EMVI+, CRM+ and lateral pelvic nodes), the possibility of neoadjuvant immunotherapy for dMMR-colon cancer (NICHE-2- study), and finally, the management of a complete pathological response after neoadjuvant therapy, especially for patients unsuitable for sphincter-sparing surgery. Furthermore, evidence needs to be gathered regarding indications for adjuvant chemotherapy after neoadjuvant chemoradiotherapy with an ypN+ situation and Dworak-Stadium II and III.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
