submissions:

10 May 2024

Message from the Guest Editors

The field of pediatric neurosurgery is rapidly evolving on many fronts, and new breakthroughs and techniques have emerged. Furthermore, microsurgery coupled with neuroendoscopy has optimized the treatment and outcomes of most complex and dismal conditions. Besides the advances in surgical care, research and innovation has always been a major focus of pediatric neurosurgeons, exploring novel therapies, participating in clinical trials, and utilizing innovative technologies and targeted therapies with personalized treatment plans for patients with genetic disorders affecting the nervous system as well as immunotherapies in the multimodal treatment of pediatric brain tumors. Furthermore, neurocritical care advances have improved outcomes for children with critical neurological conditions. Multidisciplinary collaborative care teams have become a standard-of-care concept to ensure that pediatric patients receive the best possible care. This Special Issue will showcase advances in the aforementioned fields and how they have translated into state-of-the-art modalities in the approach to diagnose and manage pediatric neurosurgery patients.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
