Message from the Guest Editor

The incidence of gestational diabetes mellitus (GDM) and overt diabetes in pregnancy is rising globally. GDM represents an important modifiable risk factor for adverse pregnancy outcomes. GDM is also associated with negative long-term health outcomes for both mothers and offspring. There is still a lack of worldwide consensus on how to define GDM. Although much is known about GDM, evidence gaps persist at all points in translating the molecular understanding of GDM to efficacious therapies. For instance, more research is needed to find successful strategies to prevent GDM, on how to define GDM in early pregnancy, on additional biomarkers that can predict pregnancy complications, and on the long-term metabolic risk and optimal management of mother and infant after delivery. The scope of this Special Issue is to provide an overview of recent advances in the field of GDM. Therefore, researchers in the field of GDM are encouraged to submit an original article (no animal research) or review to this Special Issue (case reports and short reviews are not accepted).

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
