submissions:

5 July 2024

Message from the Guest Editor

Dear Colleagues,

Oral surgery is constantly evolving.

The pathologies remain substantially the same; however, their classifications and therapies change radically.

Surgical therapy makes use of continuous evolutions in order to make the outcome more effective in association with lower morbidity.

Think, for example, of the new endoscopic technologies, lasers, operating microscopes, piezoelectric and navigated osteotomies, but also anaesthesiological and conscious sedation techniques, which increasingly allow for better intra- and post-operative control of patient comfort.

This Special Issue aims to collect significant papers in the field of oral surgery improvement.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
