### Message from the Guest Editors

Dear Colleagues,

Gastrointestinal (GI) motility disorders are extremely common and can severely impact the quality of life of sufferers. Some GI motility disorders can be regarded as primary or 'functional', whereas others are secondary to diseases affecting the nervous system, connective tissue or endocrine organs. They can also be due to iatrogenic insult through surgery, chemo-radiotherapy or pharmaceutical drugs. In recent years, major progress in understanding the pathophysiology of GI motility disorders has been achieved through the development of novel diagnostic tools, as well as advances in treatment options. In this Special Issue, we welcome authors to submit papers on GI motility disorders with respect to symptomatology, pathophysiology, diagnosis, treatment and prognosis.

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
