Message from the Guest Editors

Dear Colleagues,

Pancreatic surgery is still one of the most challenging surgeries, because of the high morbidity and mortality. New technologies like minimal invasive techniques, including robot-assisted procedures, are becoming more frequently used.

Within this Special Issue in the *Journal of Clinical Medicine*, we want to invite you to describe the latest state-of-the-art for pancreatic surgery in different indications, like pancreas cancer, cystic tumours of the pancreas, and chronic pancreatitis.

We will cover standard procedures like pancreatic head and tail resection, as well as advanced procedures like venous and arterial resection.

Moreover, the latest developments, including translational research in the treatment of pancreatic cancer, are covered.

Prof. Dr. Robert Grützmann
Prof. Dr. Christian Pilarsky

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
