Deadline for manuscript
submissions:

20 June 2024

Message from the Guest Editors

We are pleased to introduce a Special Issue on pleural disease. Respiratory physicians, as well as many other healthcare professionals (e.g., surgeons, internists, oncologists, and infectious diseases specialists), frequently face pleural disorders during their careers. They include simple or complicated pleural effusions, pneumothorax, and primary or secondary neoplasms.

Pleural effusion is the most common manifestation of pleural disease and can be due to a wide range of underlying disorders, including cardiovascular and liver diseases, pulmonary infections, malignancies, and systemic inflammatory pathologies. Identification of the cause is essential to ensure the best treatment and provide prognostic indications.

More and more therapeutic options are available and further progress can be expected in the near future regarding interventional techniques and intrapleural treatments to achieve fibrinolysis or pleurodesis.

In this Special Issue, original articles and reviews on the diagnosis and management of pleural diseases are welcome.

an Open Access Journal by MDPI

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
