Message from the Guest Editors

The previous special issue "Integrating Clinical and Translational Research Networks—Building Team Medicine", which highlighted our collective experience from the City of Hope was a huge success. Buoyed by the enthusiastic response from our peers and colleagues, we have embarked on bringing out Volume 2. The basic theme is the same—namely, integrating academic medical centers with the clinical network in various geographic locations to ensure that all patients, regardless of their physical proximity to major medical institutions, can benefit from recent clinical advances. As in the previous volume on the importance of including basic research scientists, our aim here is to highlight translational research approaches that leverage the combined knowledge, skills, experience, expertise, and vision of clinicians in academic medical centers, their affiliated community centers, and hospitals, together with basic research scientists. We look forward to sharing our team medicine experience with our colleagues and trust that they will find the approach described in the articles included in this SI useful for guiding their approaches for treating cancer patients.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
