Message from the Guest Editor

Dear Colleagues,

Multiple gestations account for about 3.3% of all deliveries in the United States, with the majority of them being dichorionic diamniotic (DCDA) twin pregnancies. The risk of almost all perinatal complications is increased in multiple gestations, mainly preterm birth and inadequate fetal growth. Therefore, twin pregnancies necessitate closer antenatal surveillance in order to improve obstetrics outcome. The scope of this Special Issue is to provide an overview of recent advances in the field of multiple gestations and twin pregnancies with a focus on the clinical aspects of prediction, prevention, and potential treatment of adverse outcome. Therefore, researchers in the field of obstetrics and maternal-fetal medicine are encouraged to submit an original article or review to this Special Issue (case reports and short reviews are not accepted).

Keywords: twin pregnancies; multiple gestations; screening; prevention; management; biomarkers; postpartum; overweight; type 2 diabetes mellitus

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
