submissions:

closed (31 August 2021)

Message from the Guest Editor

The Special Issue seeks to provide a premier international platform for a wide range of professions, including scholars, researchers, academics, clinicians, and industry people, with the aim of including recent advances in antivirals against RNA viruses and providing an update on therapeutic strategies; discussing and presenting various types of manuscripts, including the most recent advances in antiviral drugs, promising targets for antiviral drug development, antiviral immunity, the diversity of druggable viral targets focused on the conserved domains of viral proteins, and/or the host factors required for virus infection and replication; and developing innovative and possible therapeutic strategies and repurposing drugs on the basis of promising in vitro and therapeutic results.

In this Issue, we aimed at comprehensively discussing how this knowledge will rationally orientate antiviral drug discovery to improve therapeutic intervention and reduce safety risks.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
