Message from the Guest Editor

Dear Colleagues,

This Special Issue will address newer concepts in the evaluation and management of dyslipidemia, including the rationale for newer goals in lipid treatment given recent international guidelines, global trends in the epidemiology of dyslipidemia, newer concepts and therapies in the evaluation and management of familial hypercholesterolemia, newer therapies for LDL-C lowering beyond statin therapy, the status of lipoprotein(a) as a causal risk factor and newer therapeutic approaches to address it, the evaluation and management of dyslipidemia in children, newer and emerging therapies for hypertriglyceridemia, and nutraceuticals to address dyslipidemia in COVID-19 patients.

This Special Issue will discuss the latest clinical trials and other research developments regarding newer and emerging therapies for the management of dyslipidemia to reduce ASCVD residual risk. The hope is to provide clinicians with the latest information on key aspects of the evaluation and treatment of dyslipidemia.

We are seeking papers on novel topics that help advance the evaluation and management of different aspects of dyslipidemia.

Prof. Dr. Nathan D. Wong

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
