Message from the Guest Editor

Colorectal surgery has been rapidly evolving over the last few years. Newer technologies and techniques are used. Indeed, much needs to be explored in the field, as the desire to shed light on grey areas is constantly growing, in parallel with the implementation of innovations into clinical practice. The aim of the present Special Issue is to serve as a forum for critically addressing how the advent of recent technological developments has impacted the outcomes of colorectal surgery, the way patients are managed perioperatively, postoperative recovery, and patient experience throughout an operation. Manuscripts are invited critically assessing the role of minimally invasive approaches, application of artificial intelligence and big data to decision making, peroperative patient optimization, application of transational research in coloproctology, or comparing the outcomes of different innovative approaches to colorectal diseases. In summary, the Special Issue aims to increase clinicians' knowledge of poorly explored areas of coloproctology, as well as to provide a balanced, sound, and evidence-based overview of the advances and potential perspectives in the field.

Special Issue

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi
Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
