Bio-Abio Nanocomposites for Bio-Applications

Guest Editors:

Prof. Dr. Jeong-Hwan Kim

Faculty of Cardiovascular Research Institute, Graduate Scool of Medicine, Yokohama City University, Yokohama, Japan

Dr. Maria Benelmekki

Nanomaterials Lab., College of Engineering, Swansea University, Swansea, UK

Deadline for manuscript submissions:

closed (31 May 2021)

Message from the Guest Editors

The unseen exclusive properties of nanocomposites have fascinated researchers, especially in bio-applications due to their combined/synergistic structural features with diverse components derived from nature and synthetic systems. The key challenge is a controlled synthesis of interracially/spatially well-defined heterogeneous structures, biocompatible functionalization, and stable processing to be acceptable for translational/clinical stages. Thus, harmonizing the structure–property–processing of nanocomposites of divergent (bio-abio) materials is crucial for their future bio-applications as innovative hybrid material systems.
