

## Sustainable Biocomposites

Guest Editors:

**Prof. Dr. Ahmed Koubaa**

**Dr. Mohamed Ragoubi**

**Dr. Frédéric Becquart**

Deadline for manuscript  
submissions:

**closed (30 June 2022)**

### Message from the Guest Editors

The global economy is shifting towards a bioeconomy, and there is continuous pressure to substitute petroleum-based materials with sustainable and renewable biomaterials, including biocomposites. Biocomposites are of increasing interest as a renewable, environmentally friendly alternative to non-renewable materials. They contribute to reaching environmental targets (reduction of greenhouse gas emissions (GHG) and the carbon footprint and attenuation of the impact of climate change). Thus, they contribute to building a foundation of sustainability and bioeconomy worldwide. The Euromag2020 conference entitled “*Sustainability and Biobased Materials on the Road of Bioeconomy*” addresses these issues. Manuscripts presented at this conference aim to address the challenges and opportunities of the valorization of biomass for the production of biomass for biocomposites from the extraction of natural polymers, biopolymers, and biocomposites from macro to nanoscales.
