Message from the Guest Editors

Dear Colleagues,

Historically, numerous accidents happened in the maritime and offshore industries. The consequences of these accidents are loss of life, financial loss, infrastructure damage/cargo damage, and environmental pollution. In order to address this concern in recent years, interest in risk, safety, and reliability assessment techniques for maritime and offshore industries has increased to the point where international organizations have made recommendations for the usage of particular assessment and management technologies. This Special Issue is dedicated to papers focusing on the risk, safety, and reliability assessment in the marine and offshore industries. The purpose of the invited papers is to publish the most exciting research with respect to the above subjects. High-quality papers are encouraged for publication, related to various aspects.

Contributions from disciplines outside of, but related to, risk, safety, and reliability assessment are encouraged.

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
