submissions:

closed (1 August 2023)

Message from the Guest Editors

Dear Colleagues,

Invasive species represent a risk for biodiversity worldwide, and in fact can lead to a loss of local biodiversity with the extinction of indigenous species as well as ecosystem imbalances and shifts. Furthermore, some species are a threat to economy and human health (e.g., damage to fishing gear and marine products; injuries and poisonings that can be lethal). The aim of this Special Issue is to collect valuable research focusing on the impact that invasive alien species can have on marine habitats, with particular emphasis on the sustainability and trophic relationships of marine invasive species in the new colonized habitat and ecosystems. Original and high-quality research works related to these aspects are encouraged. Those exploring the relationship between the effect of IAS on fisheries and thus ecosystems are also highly welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
