Avenue, Moscow 117997, Russia

Deadline for manuscript  
submissions:

**closed (10 November 2023)**

### Message from the Guest Editors

Algae are a key part of aquatic ecosystems. Algae diversity is very broad and is reflected in a wide range of biochemical properties predetermining the relationship between organisms and environment.

Considering algae as a potential source for manufacturing and green technologies is another important issue. Nowadays, algae receive great attention as a single object to resolve a list of contemporary concerns, such as CO<sub>2</sub> emissions, alternative energy, water purification, and bioremediation.

This Special Issue will uniquely focus on the bio(geo)chemical interactions between algae and environment. We welcome original research papers representing experimental work, field studies, new methods and equipment, theoretical approaches, and mathematical modeling in addition to review papers. We especially encourage contributions that use multidisciplinary approaches to explore biogeochemical processes in the natural environment and applied biotechnology.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
