submissions:

closed (5 July 2023)

Message from the Guest Editor

Dear Colleagues,

Maritime spatial planning (MSP) is a process used to optimise marine space allocation to various activities and the environment by avoiding negative interactions and improving synergies, thereby helping the advance towards a sustainable ocean economy. MSP represents a rapidly growing research field that integrates inputs across professional, physical, institutional and administrative boundaries. The goal of this Special Issue is to promote holistic and multidisciplinary research concerning the MSP process, seeking to achieve sustainability, develop innovation networks and foster experimentation. Priority will be given to articles presenting innovative methodologies and tools for the development, implementation and monitoring of MSP plans.

High-quality papers are encouraged for publication related, but not limited, to the following:

- Maritime activities optimisation;
- Decision support tools for a sustainable MSP;
- Case studies;
- Stakeholders' engagement in the MSP process;
- Incorporation of climate change in the MSP process;

Prof. Dr. Vicky Tsoukala

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
