Marine Ecology and Water Quality Monitoring

Guest Editors:

Dr. Haibo Niu

Department of Engineering, Dalhousie University, Halifax, NS, Canada

Dr. Pu Li

School of Marine Sciences, Sun Yat-Sen University, Guangzhou, China

Dr. Ke Yuan

School of Marine Sciences, Sun Yat-Sen University, Guangzhou, China

Deadline for manuscript submissions:

closed (1 May 2023)

Message from the Guest Editors

Marine water quality is of fundamental importance for all plants and animals that inhabit it. It also affects the quality and quantity of food that human beings can harvest from the ocean. It is critically important to conduct the monitoring of marine water quality to ensure that both the causes (contaminants) and their effects on the ecosystem can meet the regulatory requirements. This monitoring process can also be used to identify the trends of environmental and ecological changes as a consequence of multiple factors, including anthropogenic impacts.

Editor-in-Chief

Prof. Dr. Tony Clare

School of Natural and Environmental Sciences, Newcastle University, Newcastle upon Tyne NE1 7RU, UK

Message from the Editor-in-Chief

The Journal of Marine Science and Engineering (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
