Message from the Guest Editors

This Special Issue of *JMSE* is dedicated to recent advances in the area of floating permeable structures. The aim is to demonstrate hydrodynamic analyses of novel types of fish cages and/or fish nets, multi-purpose floating aquaculture systems, fish farms, permeable structures of arbitrary shape, etc., for offshore applications applying different types of numerical and theoretical models or state-of-the-art experimental testing.

upon Tyne NE1 7RU, UK

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
