Message from the Guest Editor

Dear Colleagues,

Coastal fish are important components of marine ecosystems. Furthermore, some species are the most important economic resources for the majority of professional and recreational fishing activities. On the other hand, other species represent serious threats for marine ecosystems, the economy and, in some cases, human health. These latter species are known as invasive alien species (IAS). The purpose of this Special Issue is to publish quality and impactful research articles with respect to several aspects of fish biology and ecology, also including commercial species, the impact of fishery on coastal fish communities, and biological invasion by non-indigenous fish species. Original and high-quality research directly related to the various aspects mentioned above is encouraged.

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
