Message from the Guest Editor

Dear Colleagues,

This Special Issue of the *Journal of Marine Science and Engineering (JMSE)* aims to provide an open-access forum for peer-reviewed review papers on current and emerging issues of interest in the fields of oceanography, marine biology, microbial ecology and environmental science/engineering. Emphasis for this Topical Collection will be placed on scholarly research that advances our knowledge and understanding of processes that influence and/or impact the health of the marine ecosystem (geochemical cycles, microbial ecology, marine pollution, climate change, etc.) and the development and application of marine ecosystem restoration strategies (oil spill countermeasures, habitat engineering, etc.). We invite researchers and their colleagues to contribute review papers on the state-of-knowledge, new developments as well as recommendations for future research in marine environmental science and engineering.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
