Message from the Guest Editor

Dear Colleagues,

Interest in coccidioidomycosis has increased dramatically over the past several years as the number of cases has increased and more genetic information has become available. There are 900 papers about Coccidioidomycosis within the past ten years indexed in PubMed. It is now recognized that coccidioidomycosis is a common cause of serious infections in Southern California and Southern Arizona, including the heavily populated Phoenix area. The endemic area of the organism is much larger than previously recognized and there have been several studies of the ecology and phylogenetics of these species. Our understanding of the conversion from mycelia to spherules is also growing. There has continued to be much interest in the immune response to the organism and novel studies of diagnostic tests and potential therapies have also been done. This Special Issue will showcase papers from several disciplines on *Coccidioides* spp. and coccidioidomycosis.

Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Mycology*) / CiteScore - Q1 (*Ecology, Evolution, Behavior and Systematics*)
