Message from the Guest Editors

Dear Colleagues,

The eruption of great therapeutic advances in our field, with the incorporation of biological drugs and molecules such as JAK (Janus Kinase) inhibitors, has advanced the knowledge of diagnosis thanks to new scales and results reported by patients that are being included in studies, clinical trials and randomized trials. New therapeutic targets and a better understanding of the pathophysiology of some immune-mediated diseases, such as psoriasis, atopic dermatitis, vitiligo, hidradenitis, urticaria or alopecia areata, have also emerged. In this issue, we will delve into the advances that are taking place in the different fields of clinical dermatology regarding these pathologies.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
