Message from the Guest Editors

Dear Colleagues,

The COVID-19 pandemic, which presented a greater risk of severe morbidity in older and fragile patients, resulted in higher mortality for people with chronic diseases (particularly cardiovascular disease and diabetes) and cancer, highlighting the weakness of many welfare systems all over the world.

Most responsive cancer institutes have had to redesign their strategies to continue their activities. In particular, new therapeutic protocols and follow-up procedures have been implemented. Patients have had to be carefully evaluated to plan the optimal personalized treatment and to adopt the most appropriate therapeutic strategies, including telemedicine and digital monitoring. Healthcare professionals have had to be monitored for exposure to SARS-CoV-2 using genetic/antigen diagnostic kits and serological tests and, most recently, have been vaccinated with one of the several—not yet fully studied—available vaccines.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
